

The New Mexico National Board Certified Teacher Network (NMBCT Network) would like to assist your district in supporting schools through the use of the **NBPTS** process.

Research shows that students gain one month of learning each year they are in the classroom of an **NBCT**, and there is a significant impact on student learning when a student has an **NBCT** three years in a row.

Professional Learning Facilitator (PLFs) are an intricate part of any support structure. A **PLF** does not have to be a National Board Certified Teacher, but they do benefit from the **NBPTS PLF** training.

This is the best Professional Development offered in the United States at this time.
